Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Abbey III in view of Romashov et al. Abbey III teaches a method of removing burrs from the interior surface of a slotted metal liner with the use of a cutting tool (38 or 40) by passing the cutting tool interiorly of the liner and rotating the liner with respect to the cutting tool, thereby showing all aspects of the above claim except the use of any particular type of cutting tool. Romashov et al teaches a cutting tool for the removal of burrs inside a metal workpiece where the cutting tool meets all requirements of the above claim. Because Abbey III requires some unspecified type of cutting tool for removing burrs, motivation to employ the known burr removal cutting tool of Romashov et al as the cutting tool of Abbey III, would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.

Allowable Subject Matter

Claims 1-22 and 24-38 are allowed at least because none of the cited or applied prior art shows of fairly suggests a burr removal apparatus or method employing the cutting torch structure recited in instant independent claim 1.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Japanese'016A is also cited as a further example of prior art burr removal methods and apparatus employing cutting devices.
